Mr. Pforzheimer:

Since a. you have appreciated the looseness of the Atomic Energy Act
b. interpretation of such acts may finally resolve to an estimate of the "intent" of Congress
c. there appears to be question of the extent to which the AEC is authorized to engage in intelligence
d. the question may go th high levels -

a thought occurs that you might do some sounding out as to what the "intent" was. It may have been completely rewritten or left deliberately vague.
